

## **Vote for Good**

And welcome to you all. It is Portia and the Guides. And our topic this week is Vote for Good.

We see that you all are in the preparation to vote for many in public offices. Some of you already have voted. This applies to all human beings who are voting right now.

In the United States especially there is a great time now to vote. It is difficult for many because there is so much divisiveness and consternation and one side pitted against another and name calling. Many ugly appearing things are happening. You may feel when you pull out your ballot to vote that you are confused, you don't know who is telling the truth, you don't know the stories to believe or not to believe. We are asking you here and now to vote for good.

When you are with your ballot the idea of voting for good is for you to – yes, do your research and have your conversations if you will – but come back home to the center of your being where your intuition is. This intuition is the God that created you and your spirit speaking to you. This is the highest form of truth, even if the stories or conversations or waves of emotion want to rock your boat. Stay steady at the center of your being as you are voting your ballot.

The idea of vote for good is also bigger than this political time now. It is simple. Vote for good within you, within your family system, within your community and nation and world. Vote for good. Ask for good, even if you don't have a description for what that is. But there is a part of you that does know that good feels at peace, it feels like home, it is comfort, it is true guidance and inspiration and ease. Goodness is God, the Creative Source of this realm. This realm was designed with only good, harmony, peace, kindness, love, truth, principle – all of those things that are aspects of God, the Source of life on earth, all of life.

There is no fear in this design, and when you vote for good you are voting also for love vs. fear. You are voting for trust vs. insecurity, self-doubt. When you vote for good you are asking the Universe to bring forward what is the goodness and the design of this planet, including you, including every molecule and the smallest particle in this realm.

Vote for good. Listen to your intuition and follow it. It is God and your spirit speaking to you. This will bring forward the greatest and brightest light on the planet in your being, in your family, in your community and nation and world. Vote for good.

Our love and blessings are with you always. Namaste.
